PROFESSIONAL SUMMARY

M.Sc. Software Systems student with hands-on experience in **Full Stack Development (MERN)**, **Artificial Intelligence**, and **Blockchain Technology**. Completed a 6-month Software Developer internship at **Hazzino Technologies**, shipping production features for international clients in the **United States** and **Malaysia**. Published peer-reviewed research on quantum computing and won first prize at a national hackathon for an AI/Quantum Computing project.

EDUCATION

PSG College of Arts and Science	2023 – 2028
<i>Master of Science (M.Sc.) Software Systems</i>	CGPA: 6.9 / 10 (69%)
Hayagreeva Vidyalaya Matric Higher Secondary School	2022 – 2023
<i>Higher Secondary Certificate (HSC)</i>	82.1%
Hayagreeva Vidyalaya Matric Higher Secondary School	2020 – 2021
<i>Secondary School Leaving Certificate (SSLC)</i>	80%

EXPERIENCE

Hazzino Technologies	Jan – Jun 2026
<i>Software Developer Intern (MERN Stack)</i>	<i>Coimbatore, Tamil Nadu</i>
- Built full-stack modules for Rent Around, a US vehicle rental platform, including booking management, authentication, and an admin dashboard (React.js, Node.js, Express.js, MongoDB). - Developed patient registration, appointment scheduling, and hospital/doctor management features for a Malaysia-based medical tourism platform. - Designed REST APIs, integrated MongoDB, and implemented secure authentication across both production client codebases. - Collaborated with senior developers via Git/GitHub and Agile workflows through the full SDLC – design, testing, debugging, and deployment.	

PROJECTS

Blockchain-Based Food Supply Chain (ARICTECH) Blockchain, Smart Contracts	2026
Built a blockchain-enabled traceability platform with immutable product tracking and smart-contract-based transaction validation to combat counterfeit goods.	
Less Bits Big Planet Python, AI, Quantum Computing	2026
Built an offline AI chatbot using quantum-computing-inspired concepts; 🏆 1st Prize, Hackora Hackathon 2026.	
Cervical Cancer Prediction System Python, Machine Learning	2025
Trained and evaluated an ML model on medical datasets for early cervical cancer prediction, covering preprocessing, feature engineering, and evaluation.	

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python, C
Web & Frameworks: React.js, Node.js, Express.js, Django, HTML5, CSS3, Tailwind CSS, Bootstrap, REST APIs
Databases & Tools: MongoDB, MySQL, Firebase, Git, GitHub, Postman, Figma
Emerging Tech: Blockchain & Smart Contracts, Machine Learning, Image Processing

RESEARCH PUBLICATION

Evolution of Quantum Entanglement to Teleportation: A Historical Review with Qiskit-based Implementation – IJSRCSEIT, Vol. 12, Issue 2 (Mar–Apr 2026). DOI: 10.32628/CSEIT26121321

ACHIEVEMENTS

- 🏆 **1st Prize**, Hackora Hackathon 2026, for an AI and Quantum-Computing-based project.
- Authored a peer-reviewed research paper published in IJSRCSEIT (2026).

LANGUAGES

English (Professional Working Proficiency) | Tamil (Native)

SOFT SKILLS

Problem Solving | Leadership | Team Collaboration | Communication | Adaptability | Critical Thinking | Time Management
